UPON MOTION duly made and seconded, the Board approved and authorized the foregoing options, condemnations, and quick-takes. Department of Audits - Audit Reports and Related Audit Digests

The Board is requested to NOTE receipt of the following Audit Reports and Related Digests:

1. Audit of the Comprehensive Annual Financial Report of the Elected Officials’ Retirement System Fiscal Year 2010, and

President: “The first item on the non-routine agenda can be found on Page 8, #2 Audit of the Comprehensive Annual Financial Report of the Employees’ Retirement System Fiscal Year 2010. Mr. McCarty.”

Mr. Bob McCarty, City Auditor: “Thank you. Good morning Mr. President, members of the Board. I am Bob McCarty, I am the City Auditor. The Department of Audits has completed its annual audit of the financial statements of the Employees Retirement System for the fiscal year ending June 30 2010. We have issued an unqualified opinion which states that the financial statements present fairly in all material respects the financial position of the system for the year ended June 30, 2010 in conformity with general accepted accounting principles. In addition to our audit, we have prepared a separate report required by both generally accepted auditing standards and Government Auditing Standards, which addresses a System’s compliance with certain laws and regulations and the internal
control over financial reporting relating to the financial statements. The System had two significant deficiencies in internal control over its financial reporting during fiscal year 2010. A significant deficiency is a controlled deficiency that adversely affects the System’s ability to initiate, authorize, record, process or report financial data reliably in accordance with generally accepted accounting principles, such that there is a possibility that an immaterial misstatement of the financial statements would not be prevented or detected by the System’s internal control. During fiscal year 2010, the System partially resolved our previous finding, which was number 2009-1 that related to a retiree payroll records being centralized, and documents being properly marked as final. However, the Retirement System did not resolve the section that related to differences between the payroll vendor’s records and the System’s general ledger. While the System revised its procedures during fiscal year 2010 for reconciling these differences, those procedures were not applied consistently and did not provide an adequate audit trail. We recommend that the System establish procedures and consistently apply those procedures to ensure that monthly reconciliations are prepared to explain any differences. The System agrees with the finding and the recommendation and will take the necessary measures to
document the procedures to reconcile the payroll reports. They stated that the procedures will be revised during fiscal year 2011 to include all processes, which would clarify the payroll reconciliation process. During fiscal year 2010, we found and we stated in the Finding 2010-1, that salary data sent to the actuary by the System for active employees at June 30, 2010 was not accurate. The June 30, 2010 salaries of active employees sent to the actuary were actually that as of June 30, 2009. The correction to this error resulted increasing the employer contribution by $1,865,000.00. Increasing the active member actuary liability by $11,844,44.00 and increasing the total unfunded actuary liability by $11,424,000.00. We recommend that the System implement procedures to verify the accuracial data sent prior to their submission. Again, the System agrees with the finding and recommendation and will take necessary measures to ensure the accuracy of the actuary data. They stated that they are currently developing in-house programs to create active membership data files and expects to launch the new program by July 2012. In the meantime, they will implement procedures to verify that the data sent to the actuary is accurate and will confirm with the actuary that the proper data is being used. This significant deficiency concerning the actuary salary data is considered to be a material weakness. A material weakness is
a significant deficiency that results in a possibility that a material misstatement of the financial statements will not be prevented or detected by the Systems internal control. As part of obtaining reasonable assurance that whether the System’s financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements non-compliance with which would have a direct and material effect on the determination of financial statement amounts. The results of our tests disclosed no instances of non-compliance or other matters that are required to be reported under general -- I am sorry -- under Government Auditing Standards. We will follow-up on our findings as part of our fiscal year 2011 audit, and we will review the new payroll procedures with a walk-through in June of 2011.”

President: “Thank you. Ms. Spencer do you want to say anything or do you agree?”

Ms. Spencer: “I agree with the --.”

President: “You can come up.”

Ms. Spencer: “I do agree --.”

Comptroller: “State your name.”

Ms. Roslyn Spencer, Ex. Dir. for the Employees’ Retirement System: “I do agree with Bob’s findings and the actions that
are being taken. We will be working with Bob to do a walk
through in June to ensure that the actions that we said we would
put into place are in fact in place and working. So that our
next audit will be easily traced.”

President: “Okay, madam Mayor.”

Mayor: “So, the systems that you are going to be checking in
June are they already in place now? Are you in the process of
making the corrections?”

Ms. Spencer: “Ah one – they are not in place yet. We are
working --.”

Mayor: “So, you have a time frame?”

Ms. Spencer: “We do. But we can meet their timeframe.”

Mayor: “What is the timeframe for when you think that it is
going to be in place?”

Ms. Spencer: “One is an in-house system that we are trying to
implement to compare to two payrolls. That should be completed
by the end of this month, and the second part to that is to
require our actuary to compare this year’s data that we give
them to the previous year data to see if there is any fall out.
So, that is already being implemented. So we should have the
in-house comparison procedures done by the end of this month and
tested prior to the audit just coming in.”

Mayor: “And do you --- another question. Do you think that if
it is the end of this month, lets just put it into April, do you think June give you enough time to make an assessment?"

City Auditor:  "Yes it will."

President:  "Thank you.  The Audit has been NOTED."

Circuit Court for Baltimore City - Case Management Docket Grant Award Agreement

ACTION REQUESTED OF B/E:

The Board is requested to approve and authorize execution of a case management docket grant award agreement with Baltimore Mental Health Systems, Inc. The period of the agreement is March 1, 2011 through June 30, 2011.

AMOUNT OF MONEY AND SOURCE:

$29,748.00 - 6000-601111-1100-333600-406001

BACKGROUND/EXPLANATION:

In this new program, certain felony defendants with serious mental illness will receive court-ordered community-based treatment and support services as a condition of probation, instead of a jail sentence.

Under the terms of this agreement, the Circuit Court Medical Services Division will hire a licensed Clinical Social Worker to assess defendants for eligibility for this new program. This position will link defendants to community mental health and other programs. The social worker will also track the defendant’s compliance with treatment and work closely with the presiding judge, attorneys, parole and probation, and others.

ACTION REQUESTED OF B/E:

The Board is requested to approve and authorize execution of the first amendment to a service agreement with Verizon Maryland, Inc. (Verizon). The Board is also requested to authorize payment through expenditure authorization. The amendment extends the period of the agreement through June 30, 2012.

AMOUNT OF MONEY AND SOURCE:

$500,000.00 – 2039-000000-1330-158400-603084

BACKGROUND/EXPLANATION:

On July 30, 2008, the Board approved a one-year agreement with Verizon, with the option to renew for two one-year periods. This first amendment will extend the period of the services agreement through June 30, 2012 and will provide Centrex and additional services. A request for proposal for improved telephone service for the City of Baltimore to replace its current Centrex service has been issued and bids are due on May 25, 2011.

Because of the large number of Centrex phone lines the City currently has, the successful vendor would need approximately one year to commence implementation from Centrex service to a new technology. The new technology would be phased in over time. Therefore, the City would need to continue some Centrex services during this implementation.

The Board is requested to approve and authorize execution of an amendment no. 1 to agreement with the Patton Harris Rust & Associates, for WC 1199, Study of Ashburton Pumping Station Improvements. The amendment extends the period of the agreement through March 16, 2012.

The initial schedule of this project called for all work to be completed by March 15, 2011. Due to delays beyond the control of the consultant, the schedule has been revised on several occasions to reflect the days. The delays are attributed to the insufficient time that was allotted in the initial project for the City’s review of two memoranda which were significantly more detailed and more voluminous than originally planned. Therefore, the Bureau is requesting a no-cost time extension.
